Dear Ms Lange:

I support the Coastal Conservation Association (CCA) position stating that until the National Marine Fisheries Service (NMFS) can demonstrate that opening the Exclusive Economic Zone (EEZ) to any kind of striped bass fishing will not disrupt management of striped bass in any state, it is precluded from doing so. Any effort to open the EEZ will face the dubious legal task of reconciling a maze of federal and state management plans. Opening the EEZ simply cannot be accomplished without a detrimental impact on the resource and all of the state measures protecting that resource. The meshing of federal and state conservation regimes is very complicated.

Please remember that during a similar attempt to open the EEZ in 1995, CCA argued that under the Atlantic Striped Bass Conservation Act, NMFS could not open the EEZ unless it could determine that such action would not disrupt management of striped bass by the states. NMFS ultimately agreed with CCA's position and the EEZ remained closed. Since the legal requirements of the Act have not changed, I believe that the EEZ should remain closed despite an ASMFC vote earlier this year.

Sincerely

September 2003

Dear Ms Lange:

I support the Coastal Conservation Association (CCA) position stating that until the National Marine Fisheries Service (NMFS) can demonstrate that opening the Exclusive Economic Zone (EEZ) to any kind of striped bass fishing will not disrupt management of striped bass in any state, it is precluded from doing so. Any effort to open the EEZ will face the dubious legal task of reconciling a maze of federal and state management plans. Opening the EEZ simply cannot be accomplished without a detrimental impact on the resource and all of the state measures protecting that resource. The meshing of federal and state conservation regimes is very complicated.

Please remember that during a similar attempt to open the EEZ in 1995, CCA argued that under the Atlantic Striped Bass Conservation Act, NMFS could not open the EEZ unless it could determine that such action would not disrupt management of striped bass by the states. NMFS ultimately agreed with CCA's position and the EEZ remained closed. Since the legal requirements of the Act have not changed, **I believe that the EEZ should remain closed despite an ASMFC vote earlier this year.**

Sincerely
